HOW TO ORDER BY MAIL

YOUR NAME AND ADDRESS—Be sure that your name and address are written very plainly on each order.

IT MATTERS NOT HOW SMALL YOUR ORDER—nor what you may want in the seed line, we shall be glad to hear from you. Our ambition is to serve you in a manner that will make you one of our satisfied customers.

COUNTER CUSTOMERS—We suggest to those who purchase in person at our store the advantage of having their lists made out before they call. They may be left and called for later, taken at once, or shipped. In any case it is a great saving of time to the purchaser. The list should have full name and address written on it so that our catalogue may be mailed to the purchaser as issued. We also urge early purchases.

ERROR IN FILLING OF ORDERS—We use the greatest of care in filling, checking and packing orders. Yet should anything be omitted we will promptly forward when advised. Keep a duplicate copy of your order for comparison.

REMITTANCES may be made by Express Money Order, P. O. Money Order or Bank Draft; if stamps or cash, send in Registered Letter. We must decline sending goods C.O.D. unless 25 per cent of their value accompanies the order.

ACCOUNTS—Parties having no account with us—who order goods without remittance—must furnish satisfactory reference.

WE CARRY ONLY ONE GRADE OF SEED—That is the best procurable. We fill all of our own seed packets from fresh seed of the highest purity and germination. Follow our Planting Guide and Cultural Directions as given in our catalog.

MARKET GARDENERS should avail themselves of Market Gardeners' privileges and write for special quantity prices.

NON-WARRANTY—The Liefgreen Seed Co. gives no warranty, express or implied, as to the description, quality, productiveness, or any other matter of seeds, bulbs, plants or trees they send out, and they will not be responsible in any way for the crop.

GIANT DOUBLE "TECOLOTE"
RANUNCULUS

Liefgreen's Ranunculus

Ranunculus

LIEFGREEN'S GIANT "TECOLOTE"

A more wonderful display of color cannot be pictured than a mass of Ranunculus in full blossom and we know of no other bulb that will give the profusion of blooms for the amount of money expended. The large globular flowers 2 and 3 inches across carry a wide range of bright shades, including crimson, orange, pink, yellow and white, with some striped and variegated borne on strong stems 8 to 10 inches in length. A most gorgeous effect in beds and borders, while as cut flowers they are very satisfactory, keeping fresh in water for a long time. Once grown you will never be without them.

Culture: In warm climates, Ranunculus may be planted in early Fall for Winter bloom and from that time in succession until Spring. For pot grown Winter flowers, plant early in Fall, water thoroughly and plunge in ashes or sand until they are sprouted.

The bulbs resemble tiny clumps with finger-like projections which should be planted pointed down. Soak the bulbs in water 2 hours and cover about 2 inches deep, 4 to 6 inches apart, and if soil is at all heavy, cover with peat moss in order that leaves will push through readily without heaving the soil. A rich under-soil is desirable, but use no fresh fertilizer around the bulb. Plant in a partly shaded location, particularly if grown for blooming in late Spring or early Summer, otherwise if planted in locations like the Phoenix, Arizona, valley during the Fall months in a sunny, open location. An abundance of water and good drainage is essential.

"Giant Tecolote"

By far the largest and most magnificent strain of Ranunculus ever offered the public. Flowers very double, blended with semi-double. Centers are usually light green. Our mixture contains a beautiful range of colors. Do not confuse them with the cheap kinds offered at reduced prices.

JUMBO—Extra large bulbs. Mixed colors. 8c each; 85c per doz.; \$6.00 per 100.

TOP SIZE—Large bulbs. Mixed colors. 7c each; 75c per doz.; \$4.50 per 100.

No. 1 Size—Mixed colors. 5c each; 50c per doz.; \$3.00 per 100.

No. 2 Size—Mixed colors. 5c for 2; 25c per doz.; \$1.75 per 100.

Gold Shades No. 1—Colors running from straw through the entire range of yellows to deep golden yellow. 7c each; 75c per doz.; \$4.50 per 100.

Red Shades No. 1—Giant Tecolote variety. Colors of dark crimson, scarlet, orange-red, and all other shades of red. 7c each; 75c per doz.; \$4.50 per 100.

Pink Shades No. 1—A Giant Tecolote of pink shades that contain all shades of pink from light pink to deep rose color. 7c each; 75c per doz.; \$4.50 per 100.

White Shades No. 1—A new item of beautiful waxy white and extra large size. About 90% will be pure white, the balance will be off-whites, creams and light yellows. 7c each; 75c per doz.; \$4.50 per 100; all postpaid.

Plant Select Anemones

Liefgreen's Select Anemones.

These lovely flowers are deservedly popular. With an exceedingly wide range of color and color combinations, and an adaptability for both forcing and outdoor planting, the Anemone is a most useful and satisfactory flower. The plants thrive best in a rather rich, sandy loam, but will do well in most any well-drained garden soil. Ready September 1st.

Culture: For pot forcing, place six or more in a pot of proportionate size and handle the same as Tulips and Hyacinths, keeping them well watered at blooming time. For outdoor, they are suitable for borders, rockeries and mass bedding. Plant the tubers 6 to 7 inches apart, 2 inches deep, laid flat with the growing knobs upward. Soaking the tubers before planting hastens the blooming. In warm climates, free of heavy freezing, Anemones may be planted from early Fall to early Spring and several plantings will produce a continuous bloom in 4 to 5 months' time. Under colder conditions, a mulching of leaves and litter is necessary and in regions subject to extreme cold, the tubers should be carried over in a cold frame and planted in the Spring. After flowering and the leaves have dried off, lift the tubers, dry and store in dry sand until next planting time. In warm climates they may remain in the ground and rested under rather dry conditions.

DAFFODILS

PAPER WHITE NARCISSUS

Daffodils and Narcissus

All varieties are easy to grow and are very popular as cut flowers because of their splendid keeping qualities. They may be grown in cultivated beds or borders or in the shrubbery border where they may be allowed to naturalize. While they prefer partial shade, they will thrive in full sun. Plant from late September through January in any good garden soil, covering to a depth of 5 inches.

All Narcissus may be grown in Bulb fibre and culture is the same as for Hyacinths.

Trumpet Daffodils

KING ALFRED—This is one of the largest flowers and longest stemmed variety now being offered. The flowers are pure yellow, the trumpet is slightly frilled, and there are 3 or 4 flowers produced from each bulb. Extra large bulbs. 15c each; 80c for 6; \$1.50 per doz.; \$9.50 per 100, postpaid.

GLORY OF SASSENHEIM—Yellow trumpet with creamy white perianth. Large bold flower of exceptional beauty. 25c for 2; 65c for 6; \$1.25 per doz.; \$8.00 per 100, postpaid.

EMPEROR—Brilliant golden yellow flowers of immense size, with wide overlapping perianth. Extra fine. 25c for 2; 65c for 6; \$1.25 per doz.; \$8.00 per 100, postpaid.

Daffodils

MIXED VARIETIES FOR NATURALIZING

A good mixture that has proven desirable for this purpose. Plant liberally and enjoy their beauty year after year. Our bulbs are double nose. Mixed varieties 85c per doz.; \$3.25 for 50; \$6.00 per 100; all postpaid.

Double Daffodil or Von Zion

This is the wonderful double Daffodil that we all know so well. The flowers are a beautiful golden yellow and very double. Excellent for forcing in pots and also for outdoor culture. Our bulbs are Double Nose, which throw more flowers than the Single Nose type. 12c each; 65c for 6; \$1.25 per doz.; \$8.00 per 100, postpaid.

Chinese Sacred Lily

LARGE BLOOMING SIZE

Chinese Lilies are wonderfully attractive as house ornaments and well deserving a place in the home of every lover of plants. The flowers are pure white with yellow cup. May be planted in the open ground or in bowls. After plants are through blooming in the home all Narcissus may be planted out of doors, and will bloom the following year. Culture of Chinese Lilies the same as for Paper Whites. Fancy, sound, bulbs. 10c each; 55c for 6; \$1.00 per doz.; postpaid.

Single Narcissus

POETICUS ORNATUS — A short cupped Narcissi. Pure white perianth with broad cup delightfully edged scarlet. 10c each; \$1.00 per doz., postpaid.

Polyanthus Narcissi

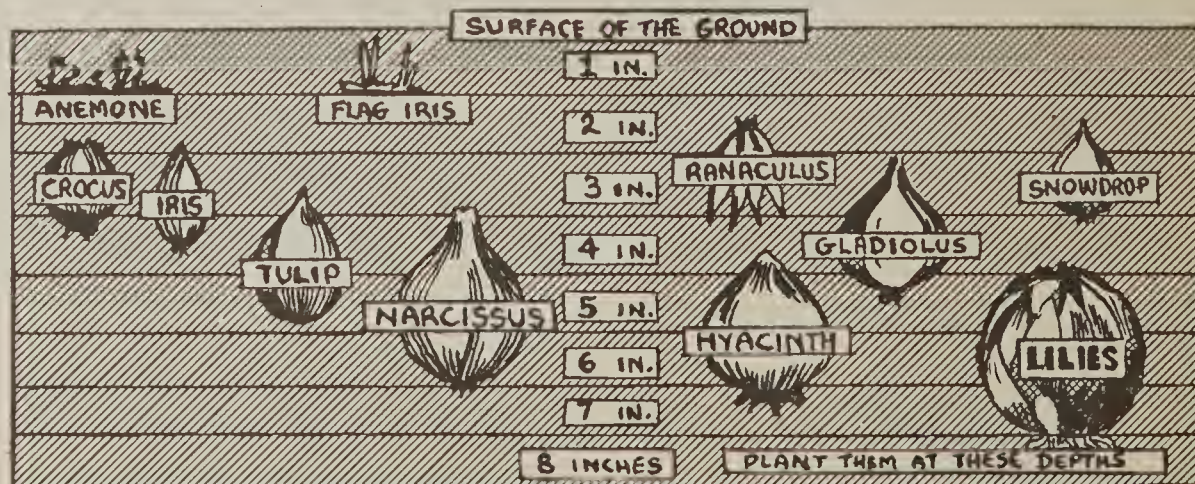

PAPER WHITE NARCISSUS — Grandiflora. Everyone knows the Paper White Narcissus. As a quick-growing bulb it has no equal. The flowers are pure white and very fragrant, produced on long, stiff stems. They can be forced into bloom in from 6 to 8 weeks' time, and by planting at intervals of 4 weeks apart you will have a succession of blooms throughout the Fall and Winter season. When grown in water, place the bowl in a dark cool place until sprouted 3 or 4 inches. Then move to light location and you will have blooms in a few weeks. Narcissus enjoys a cool temperature as warmth tends to grow excessive foliage. A small amount of charcoal in the water will tend to keep it cool and sweet. Large size bulbs. 15c for 2; 40c for 6; 75c per doz.; \$5.00 per 100.

SOLEIL D'OR—Yellow Paper White. Beautiful golden yellow flowers with a deep orange cup. Can be bloomed just as easy as the Paper White Narcissus. 12c each; 65c for 6; \$1.25 per doz.; \$8.00 per 100; postpaid.

Jonquil

A species of Narcissus with very fragrant flowers; excellent for cutting. Culture same as for Narcissus.

CAMPERNELLE GIANT SINGLE—The largest and finest single Jonquil; color pure yellow; very fragrant. 10c each; \$1.00 per doz.; \$6.50 per 100, postpaid.

DEPTH TO PLANT BULBS

Freesias and Tulips

Freesias

An easily grown, attractive and fragrant flower for both indoor and outdoor culture. Few bulbs flourish in the home window with so little care as do the Freesias, and a single plant in flower will soon fill the room with a most delicate perfume. The new colored varieties are charming and all make excellent cut flowers.

CULTURE: Freesias may be planted from August 15th, through January. They are easily grown, blossom freely in early Spring and the bulbs will multiply and continue blooming for years. The soil should be well prepared, and though they grow well in full sun, they also may be planted in partial shade. All Freesias are fragrant and make good cut flowers.

Plant the bulbs one to two inches apart and cover to a depth of about two inches. In place of a single row, place bulbs to make a row three or four inches wide; giving a very nice effect.

Freesias may be left in the ground from year to year, or if they are taken up it should be done after the foliage has become entirely cured or dry.

Liefgreen Colored Freesias

MIXED—A special mixture and a careful blend of all colors. No whites are included. Special top size—30c for 6; 50c per doz., \$1.50 for 50; \$3.00 per 100.

No. 2 size—35c per doz.; \$2.50 per 100.

PURITY FREESIA—This is an improved white. Very large flowers of good substance and delightfully scented. Large size bulbs. 20c for 6; 35c per doz.; \$1.25 for 50; \$2.50 per 100, postpaid.

Darwin Tulips

The Darwin Tulip cannot be too highly praised. The remarkably brilliant color, their large size and their robust growth, which carries the flower on long, strong stems, make them unsurpassed as a desirable flower for cutting.

CULTURE: Plant the bulbs about 6 inches apart and about 5 to 6 inches deep. The best soil for tulips is old well-rotted manure, mixed with sand. Great care should be taken that water does not stand over or under the bulbs when planted out of doors, as they will not thrive in soggy soil. When planted in pots, plenty of drainage should be given. Tulips in pots should be treated the same as Hyacinths.

BRONZE QUEEN—A beautiful bronze with long stems. 25c for 3; 75c per doz.

CLARA BUTT—Delightful soft salmon rose. One of the leading varieties. 40c for 6; 75c per doz.

CENTENAIRE—Pretty deep rose, flushed claret with light blue center. 10c each; 90c per doz.

FARNCOMBE SANDERS—Brilliant scarlet with clear white base. Famous as a bedding variety. 40c for 6; 75c per doz.

INGLESCOMBE YELLOW—Large globular flowers of a glossy canary yellow. A charming cup-shaped tulip and very fine for all purposes. 40c for 6; 75c per doz.

PRIDE OF HAARLEM—Old rose color. One of the best varieties. 40c for 6; 75c per doz.

REV. EWBANK—Heliotrope lilac with a paler edge of the petals. Fine bedder. 25c for 3; 85c per doz.

LIEFGREEN'S SPECIAL DARWIN TULIP MIXTURE—A very choice assortment with splendid range of color. 40c for 6; 75c per doz., \$5.75 per 100.

All of the above postpaid.

Hyacinths -- Plant Liefgreen's Large Flowering Varieties

Hyacinths

(LARGE FLOWERING)

With their wonderful beauty and delightful fragrance Hyacinths are one of the glories of Spring. They are seen at their best in borders or formal beds. Also very charming when grown in pots.

CULTURE: In climates similar to the Salt River Valley it is necessary to plant Hyacinths to a greater depth than they are planted in more severe climates. The reason for this is to retard the top growth, thus giving the bulb opportunity to make a root system.

In heavy soil plant the tip of the bulb 5 to 6 inches below the surface and 6 to 7 inches beneath the surface in light sandy soil. Set bulbs about 6 inches apart each way in the bed. It is advisable to use a mulch of Peat Moss on the surface to prevent the soil from baking and also to conserve the moisture.

For pot culture of Hyacinths plant one bulb only to a 5-inch pot and bury pot and all in a shaded place in the garden, covering to a depth of 6 to 7 inches. In 6 weeks or 2 months they may be removed and brought to the light, however, leaving them longer might produce better results. Once they are

brought in the light keep them near a window and plenty of fresh air and water.

Excellent bedding and potting size in the following named varieties:

GERTRUDE—Pink. Very fine rosy pink, with strong stem and good spike.

LA VICTOIRE—Carmine. A glistening deep carmine rose. The shade is lighter when grown inside.

L'INNOCENCE—White. An excellent pure white, and well suited for all purposes, either pot culture or for the garden.

KING OF THE BLUES—Dark Blue. An extra large truss of dark blue flowers, probably one of the largest varieties of Hyacinths grown.

YELLOW HAMMER—Yellow. A beautiful deep truss of pure yellow. An early variety.

BISMARCK—Blue. This is a deep porcelain blue. Extra large and early.

All of the above varieties: 20c each; 35c for 2; 90c for 6; \$1.75 per doz., postpaid.

ALL OF THE ABOVE POSTPAID.

Gladiolus -- Liefgreen's Selected Bulbs

Plant more Gladiolus bulbs this Winter. This beautiful flower thrives exceedingly well when planted from November and on during the Winter months.

Gladioli will thrive in almost any soil with the exception of extremely heavy soils. They require full sunlight and are liable to injury only from rank manure. Plant the bulbs six to nine inches apart to a depth of about four inches. We recommend free use of water during the season of active growth, particularly as the buds begin to show color, which is beneficial in producing fine flowers. We can furnish Gladiolus bulbs from November to March.

The following varieties are all choice selections of jumbo hand-picked bulbs. Plant them freely. We pay the postage.

ARABICUM. Star of Bethlehem. Throws up a tall stem with a cluster of star-shaped flowers; pure white with dark centers. Excellent for cutting, lasting a long time in water. Culture in the house is about the same as for Hyacinths. 20c for 3; 75c per doz.; \$5.50 per 100, postpaid.

Ornithogalum-Thyroides

DOUBLE FLORA PLENA

A conspicuous flower in any garden. Its tall, stout stems rise three feet high, bearing clusters of pure white double flowers, lasting in good condition for over six weeks. 15c each; \$1.50 per dozen, postpaid.

Watsonias

A beautiful flower from South Africa, and one which thrives as well in the garden as gladiolus. Plants grow three to five feet high and produce great spikes of large flowers especially valuable for cutting, lasting a long time in water. As the Watsonia is similar to gladiolus they require the same cultural methods.

New Hybrids Mixed. The finest of new shades of pink, lavender, cerise-rose and white. 75c per doz.; \$5.00 per 100, postpaid.

Muscaria

Grape Hyacinth

Heavenly Blue — The flowers appear in dense clusters resembling miniature Hyacinths. They are bright blue in color. 60c per doz.; \$4.00 per 100, postpaid.

Tigridia

BIG SHELL TIGER FLOWER

Tigridia Pavonia Grandiflora—A splendid strain of this showy garden plant. The curious three-petaled flowers are very large and are wonderfully marked and spotted. They prefer a half shaded spot and plenty of water while in active growth. Plant 4 to 6 inches apart and do not disturb until overcrowded. 25c for 2; \$1.50 per doz., postpaid.

YELLOW CALLA LILY

Agapanthus Umbellatus (BLUE LILY OF THE NILE)

A splendid ornamental plant bearing in early summer clusters of bright blue flowers on long stems standing well above the foliage. Does well in this section, but may not flower first year. Plant from November to March—large rooted divisions. 50c each; \$5.00 per doz., postpaid.

Gerbera

(TRANSVAAL DAISY)

Large daisy like blossoms with flower stems rising to a height of from one to two feet. Colors range from white to crimson, pink, rose, yellow and lilac. Require light, well drained soil and not too sunny a location in this section. Large divisions. 20c each; \$2.00 per doz., postpaid.

Sweet Peas

Sweet Peas are probably the most popular flower in America. They are loved by everyone, both for their beautiful coloring and their delightful fragrance. For the best results we offer the following instructions according to our own method of planting.

Culture: Avoid dense shade. Select a place in the open where the sun shines at least three-fourths of the day and where the vines may be trained on a trellis. Dig a trench about a foot or 18 inches wide and 18 inches deep. Place about six or eight inches of well-rotted manure on the bottom of the trench. Mix a liberal amount of manure with the soil that has been removed and replace it. After the soil has settled sufficiently, open a trench in the bed about six inches deep and plant one ounce of seed to about 20 to 25 feet of row. During the warm weather cover the seed about two to three inches deep and in cooler weather about one inch is sufficient. Care must be taken during warm weather not to rot the seed with moisture. After planting seed soak the trench thoroughly and follow with a liberal sprinkling of peat moss or dried grass to prevent the surface soil from crusting. After the Peas have grown six or eight inches begin to draw the soil to them, gradually filling the trench. This will necessitate another trench on each side of the row, through which to water the vines during the rest of the season. A peat mulch around the plants will keep them in good growing condition. Frequent cultivation is also necessary. Keep them well watered and at blooming time keep the blossoms picked to insure a long growing season.

Liefgreen's Giant Spring Flowering Spencer

Liefgreen's Flower Seeds

GENERAL PLANTING SUGGESTIONS

Light, rich loamy soil is best suited to flowers. If the soil is of heavy nature, add sand or peat moss and a liberal scattering of air-slacked lime to form a better texture. Prepare the soil as fine and smooth as possible. The depth of planting flower seeds is very important. Very fine seeds should be planted on the surface and pressed into the soil, then sprinkle over the surface a light mulch to aid germination. Medium sized seeds should be planted $\frac{1}{4}$ to $\frac{1}{2}$ inch deep, while larger seeds such as Sweet Peas, should go deeper. A light mulch should be spread over all seeds planted, as it is the best method of keeping the soil moist and cool. Water with a fine spray to avoid washing the soil from the seeds. When large enough, thin young plants from 2 to 12 inches apart, depending on the variety. Give them plenty of room to develop, allow plenty of moisture and good drainage and the results will surprise you.

Giant Snapdragon

LIEFGREEN'S ARIZONA GIANTS—Snapdragons are one of the most valuable and decorative flowers. Can be easily grown from seed, thrive in any soil and bloom freely. Broccoli

GREEN SPROUTING ITALIAN—Calabrese—The edible portion differs from other Broccolis in use, in that the flower heads are borne on long stems which are cooked and eaten along with the flower and are of a very mild flavor, having none of the distinct cabbage flavor. Plant and care for as Cabbage or Cauliflower. Pkt. 5c; oz. 30c; ¼ lb. 90c; 1 lb. \$3.00.

Brussels Sprouts

IMPORTED HALF DWARF PARIS MARKET—The culture for Brussels Sprouts is the same as for Cabbage. Pkt. 5c; oz. 25c; ¼ lb. 85c; 1 lb. \$2.50. Postpaid.

Liefgreen's Selected Table Beet Seeds

CULTURE—In the warm sections of Arizona Beets may be planted from August 1 until May 1. In the higher altitudes planting may commence as soon in the Spring as weather conditions will allow. One ounce of seed will plant from 50 to 75 feet of row and 6 to 8 pounds are required per acre. Plant in rows of 18 to 24 inches apart and thin to 3 or 4 inches in the row. Cover the seed 1 inch deep and firm the soil after planting. Beets enjoy a light, rich, loamy soil, and frequent cultivation is necessary for rapid and tender growth.

PRICES ON TABLE BEET SEED unless noted are uniformly: Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 85c; 5 lbs. \$4.00; 10 lbs. \$7.00. Postpaid.

EARLY WONDER—A very fine market and table beet. This is an early beet with a very small tap root, small top and is of exceptionally fine dark red color. The beets are slightly flattened and mature very evenly. For a table as well as a canning variety we cannot recommend it too highly.

DETROIT DARK RED—This is a fine main crop all-purpose beet. Sweet, tender and fine grained. The rich, dark red color makes an attractive dish. Pkt. 5c; oz. 15c; ¼ lb. 40c; 1 lb. \$1.00; 5 lbs. \$4.50; 10 lbs. \$8.50. Postpaid.

CROSBY'S EGYPTIAN—Our Crosby's is a very superior extra early strain of garden beet which has been very carefully selected for type. It excels in handsome form, a good size, small tops, very small tap root, fine quality, and above all, it makes a rapid growth. The flesh is deep red. Ready for use in 45 to 50 days.

EARLY BLOOD TURNIP—Of large growth. Flesh very tender and retains its blood red color when cooked.

Stock Beets

Stock Beets are recognized as a very valuable stock food.

MAMMOTH LONG RED—The roots of this variety grow to a very large size.

GOLDEN TANKARD—Contains more sugar and less water than any other Mangel.

GIANT HALF SUGAR—A very heavy yielder. White solid, tender flesh and very sweet.

SUGAR BEET (White Klein Wanzleben)—Not the largest in size, but the richest in saccharine. It will fatten hogs as quickly as grain.

ALL STOCK BEETS PRICES: Pkt. 5c; oz. 10c; 1 lb. 60c; 10 lbs. \$5.50. Postpaid.

LUCULLUS SWISS CHARD

Swiss Chard

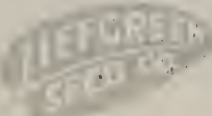

FOLIAGE BEET—(Lucullus)—Culture, same as Beets. The leaves of Swiss Chard are used for greens the same as Spinach or Beet tops. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 60c; 10 lbs. \$5.50. Postpaid.

IMPROVED COPENHAGEN MARKET

Cabbage

Good seed is of the utmost importance in all crops, and no doubt has a greater effect on the final outcome of the Cabbage crop than any other. Do not take any chances by using poor seed. Seed taken from selected heads grown under proper conditions will repay you many times at harvest for its extra cost. In buying our strains of Cabbage you take the first step in the right direction.

CULTURE—In the warm sections of Arizona, seed should be planted during July and August, in shaded beds, for Fall crop. Also during the Fall and Winter months for Spring harvest. Six ounces will produce plants for 1 acre when transplanted. If drilled in rows and thinned out, 3 to 5 pounds per acre is required.

GOLDEN ACRE CABBAGE—Selected Danish Import—One of the earliest varieties of Cabbage. It is dwarf in habit, resembles the Copenhagen Market Cabbage, but smaller heads, averaging 2½ to 3 pounds in weight. Pkt. 5c; oz. 35c; ¼ lb. \$1.00; 1 lb. \$3.00.

COPENHAGEN MARKET—Our seed of this valuable new early Cabbage comes to us direct from Denmark. Pkt. 5c; oz. 30c; ¼ lb. 80c; 1 lb. \$2.50.

EARLY WINNIGSTADT, Imported—One of the best early sorts. Pkt. 5c; oz. 25c; ¼ lb. 80c; 1 lb. \$2.50.

DANISH BALL HEAD or HOLLANDER, Imported—The hardiest round headed Cabbage in cultivation. Pkt. 5c; oz. 25c; ¼ lb. 80c; 1 lb. \$2.50.

EARLY JERSEY WAKEFIELD, Imported—Grows a small pointed head like the Winnigstadt. Pkt. 5c; oz. 25c; ¼ lb. 80c; 1 lb. \$2.50.

EARLY FLAT DUTCH—Pkt. 5c; oz. 25c; ¼ lb. 80c; 1 lb. \$2.50.

RED DUTCH—Heads of deep color and very solid. Excellent for cold slaw and for pickling. Pkt. 5c; oz. 30c; ¼ lb. \$1.00; 1 lb. \$3.00.

Chinese Cabbage

Grow it the same as you would lettuce. Our seed is the genuine Chinese imported. Pkt. 5c; oz. 25c; ¼ lb. 85c; 1 lb. \$2.00.

Collards

CULTURE—Similar to Cabbage, but does not produce a head.

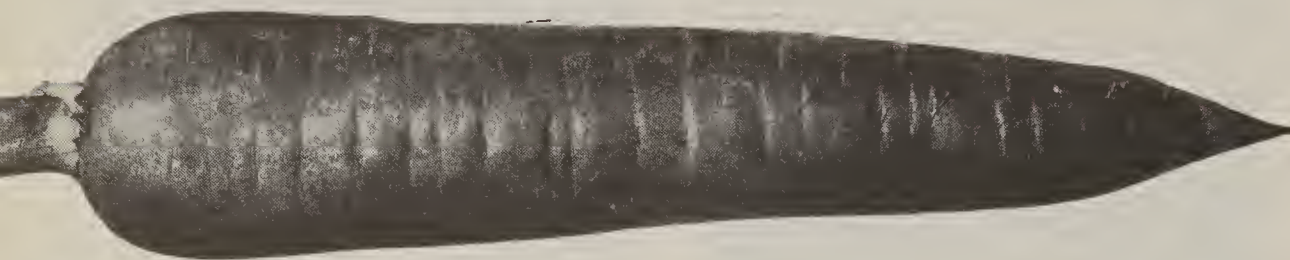

TRUE GEORGIA—A strong, growing variety with light green leaves. Pkt. 5c; oz. 15c; ¼ lb. 35c; 1 lb. \$1.00. Postpaid.

Carrots---Plant Liefgreen's Quality Seeds

Carrots grow in most any soil, although a sandy loam plentifully enriched with well-rotted manure suits them best. Sow 1 oz. of seed to 100 feet of row, 4 lbs. to the acre. Plant from September to May in rows 15 to 18 inches apart. Keep clean by frequent hoeing and weeding.

DANVER'S HALF LONG—A favorite with market growers and shippers. The tops are medium size. The mature roots are of medium length, 6 to 8 inches long, tapering uniformly to a blunt point. The flesh is of deep orange, tender and of good quality. Pkt. 5c; oz. 15c; ¼ lb. 30c; 1 lb. 90c; 10 lbs. \$8.00.

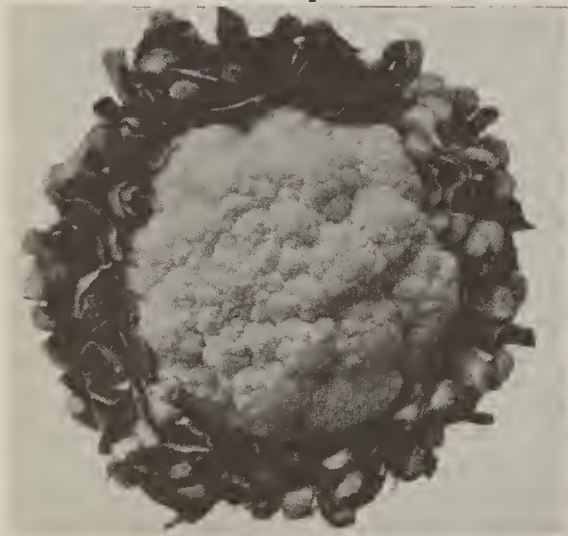

LIEFGREEN'S SELECT IMPERATOR

Cauliflower

SELECT EARLY SNOWBALL — The earliest and surest heading variety on the market. Our strain of Snowball is grown by one of the most particular Danish growers and imported by us from Denmark. Pkt. 5c; ¼ oz. 85c; oz. \$2.50; ¼ lb. \$6.25.

ENDIVE (Green Curled)

LIEFGREEN'S IMPROVED TYPE
HEAD LETTUCE

Lettuce

CULTURE—Lettuce is best suited to rich, light, loamy soil and should never be planted in worn-out soils. Sow seed on ridges in rows 18 inches apart and when plants are large enough thin to 10 to 15 inches apart. Run the water in furrows between the ridges and never allow the water to touch the plants.

When Lettuce is planted early in hot ground plant 2 pounds of seed to the acre. During the Winter season, when the soil is cool, 1¼ pounds per acre is plenty.

Head Lettuce

NEW YORK No. 515, IMPROVED—An early variety well adapted to late Spring production in the Salt River Valley, resistant to tip burn, heads medium large, compact and attractive.

NUMBER 12, NEW YORK—A type of early maturing New York Lettuce. Matures about 10 days earlier than the regular New York.

NEW YORK SPECIAL—Hardy, uniform heads, light green outer leaves with the center bleached pure white.

ARIZONA WONDERFUL—A splendid variety for market or home use. Large, crisp, tight heads and a great favorite wherever grown.

IMPERIAL "D"—Medium heads, desirable for Fall crop. Will stand considerable cold, but susceptible to tip burn in warm weather.

IMPERIAL "152"—Medium sized, solid heads. Quite hardy, very sure heading, also resistant to brown blight. Write for Prices.

IMPERIAL "615"—One of the largest heading varieties. Resistant to brown blight, does not make suckers. Desirable for early Spring cutting. Write for Prices.

ICEBERG—A splendid Head Lettuce for Spring planting.

Leaf Lettuce

PARIS COS or ROMAINE—Leaves yellowish white, very crisp and tender, a self-blanching lettuce of superior flavor.

DENVER MARKET—For the family garden plant this variety broadcast on ridges, allowing it to grow thick.

Prices on all varieties of Lettuce seed listed unless noted otherwise: Pkt. 5c; oz. 15c; ¼ lb. 40c; 1 lb. \$1.25; all postpaid. Ask for prices in larger quantities for commercial planting.

SWEET SPANISH ONION

Liefgreen's Onions

WHITE SWEET SPANISH—Like the original Sweet Spanish, it is a good keeper. We are very proud of our strain as it has given wonderful results. Pkt. 5c; oz. 30c; ¼ lb. \$1.00; 1 lb. \$3.00. Postpaid.

RIVERSIDE, SWEET SPANISH—Large, well-shaped brown onions weighing 1 to 3 lbs. Globular, with golden yellow skins, white flesh, very mild, with a pleasing flavor. Pkt. 5c; oz. 25c; ¼ lb. 80c; 1 lb. \$2.50. Postpaid.

GREAT GREEN BUNCHING ONIONS — Produces the long tender, sweet green Onions which are so popular on the table of those who enjoy good eating. Pkt. 5c; oz. 25c; ¼ lb. 80c; 1 lb. \$2.50. Postpaid.

CRYSTAL WHITE WAX—A large white Bermuda type Onion that has become very popular. It is very early, very mild in flavor and an excellent shipper and keeper. Pkt. 5c; oz. 25c; ¼ lb. 80c; 1 lb. \$2.50. Postpaid.

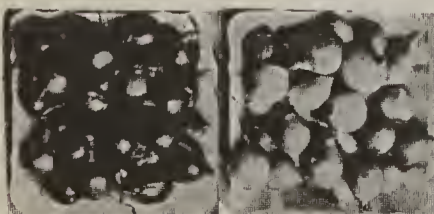

SILVER SKIN—One of the leading white Onions. Average diameter is 4 to 6 inches. The thick skin is a clear silvery white; flesh snow white. Pkt. 5c; oz. 25c; ¼ lb. 85c; 1 lb. \$2.50. Postpaid.

Liefgreen's Grass Seeds

Liefgreen's Lawn Seeds are thoroughly cleaned and tested for purity and germination.

DIRECTIONS FOR PLANTING — First level the ground thoroughly and pulverize the soil. Enrich with our Lawn and Garden Fertilizer at the rate of 100 pounds to 3000 square feet. Scatter the seed evenly over the surface at the rate of 1½ to 2 pounds to 10x10 feet for Australian Rye Grass; one pound to 10x20 for Blue Grass; one pound to 500 square feet for Bermuda Grass and one pound to 2000 square feet for White Dutch Clover when planted with other grasses. After sowing spread a light mulch of Horticultural Peat Moss over the surface. The mulch will quicken germination and prevent the soil from crusting. Water carefully and regularly with a fine spray, never allowing the surface to dry out until the grass is up. Plant Rye Grass, Blue Grass and White Clover from September 1st until early Spring and Bermuda Grass during the Spring, Summer and Fall months.

When you buy Liefgreen's Lawn Grass Seed you avoid failure and disappointment.

LIEFGREEN'S 8-9-6 COMMERCIAL FERTILIZER—Is a scientifically prepared chemical compound having the most necessary elements for the promotion of plant growth. It not only enhances the beauty of the bloom and the color of the lawn, but as a wonderful stimulant and plant food for vegetables and field crops, flowers, lawns, shrubs and trees. Easily applied as it is in powder form. Quick and unusually lasting results. 5 lbs., 40c; 10 lbs., 75c; 25 lbs., \$1.25; 50 lbs., \$1.75; 100 lbs. \$3.00.

Peat Moss

Peat Moss is a valuable soil improver for all horticultural purposes. It consists chiefly of decomposed vegetable or organic matter and increases the humus content of the soil. It absorbs ten times its weight in water, releasing it for the plants in periods of drought. Use Peat Moss liberally on flower and vegetable gardens and on lawns. Mulch roses, fruit trees, etc., to conserve moisture. A bale of Peat Moss when loosened will cover 700 square feet. Per bale, \$3.95 F.O.B. Phoenix.

Vigoro

COMPLETE PLANT FOOD

Inexpensive—Just a Few Pounds of Vigoro Will Make Your Garden Look Like a Million.
